

Advancing Knowledge & Skills in Nursing

CNE course on Research Methods A Hands-On Approach to Design, Data Analysis, and Scholarly Writing (An INC accredited Continuing Nurse Education)

The Paradigm Shift

The Evolving Research Landscape:

Modern academic and professional public health environment is being shaped by digital tools, evidence-based decision-making, and artificial intelligence.

Bridging Theory and Practice: Nursing faculty & students would benefit from structured methodologies that translate academic research directly into evidence-based nursing practice and improved patient outcomes.

Critical Challenges of AI Integration: AI offers efficiencies but introduces serious risks regarding accuracy, transparency, and overreliance.

Course Objective

To equip participants with practical skills to design, analyze, and communicate research, while ensuring rigor, ethics, and transparency.

Eligibility

Registered Nurses across government/private/charitable institutions

- ❖ **Nursing Faculty** in all Academic institutions
- ❖ **Nursing Masters and Doctoral students**
- ❖ **Clinical Nurses** interested in Research & other Graduate Nurses

Duration & Accreditation

30 CNE hours / 6 CNE credits

Course Details

5 Online modules:

1. Designing the Research (*Why and What to Study*)
2. Research Methodologies (*How to Study It*)
3. Navigating AI in Research and Ethics (*How to verify*)
4. Data Management and Analysis (*How to Analyze the Evidence*)
5. Scholarly Writing, Reporting, and Publication (*How to Communicate and Publish the Findings*)

The Value added Edge

- ❖ **Live, Interactive Sessions:** Online sessions uniquely designed for real-time collaboration and direct trainer mentorship, moving beyond passive lectures.
- ❖ **Ethical AI Mastery:** Master safe, transparent AI integration, giving you a competitive edge in modern academic writing, literature synthesis, and peer review.
- ❖ **Globally Respected INC Accreditation:** Earn an Indian Nursing Council (INC) accredited certificate of 30 CNE hours, designed to carry strong professional weight and global acceptance for your academic and clinical career.

Registration & Other details:

Online payment (UPI/Credit Card/Debit card/Netbanking)

Methodological Precision. Strict Academic Standards.
Uncompromising Ethical Integrity in Quality Research.

Course Philosophy

- ❖ Practical application over theory.
- ❖ Human judgment over automation.
- ❖ Verification over convenience.
- ❖ Research ethics and quality as the core safety net.

Training Faculty

Elite Faculty: Learn from distinguished experts with extensive national and international experience in public health, nursing research, and biostatistics.

Live, Expert Moderation: Every session is actively guided to keep discussions focused and directly applicable to your research.

Why Choose This Course

Tailored for Health and Social Sciences: Designed to address the unique complexities of nursing, public health, and social science research.

End-to-End Research Integration: Seamlessly connects the entire research lifecycle.

AI Literacy & Verification: Equips with the critical skills to navigate generative AI content, and how to distinguish automated assistance from human authorship.

Problem-Based Learning: uses practical exercises, research scenarios and live demonstrations.

Indian Nursing Council (INC) in the Continuing Nursing Education Regulations, 2019, has formalized the requirement of 150 hours of CNE every five years for license renewal.

About Us

Health and Beyond Consultants (HAB)

Health and Beyond Consultants (HAB) expands the vision of the Health and Beyond Foundation (HABF), delivering locally relevant, cost-effective, and high-quality public health solutions across India and beyond.

HAB has been associated with large-scale training of health professionals. From e-learning to mentorship-driven classroom sessions, our training programs empower health professionals with knowledge, skills, confidence, and compassion. (www.healthandbeyond.org.in)

Jodhpur School of Public Health (JSPH)

The Jodhpur School of Public Health (JSPH) stands as a leading institution dedicated to advancing public health education, research, and innovation in India.

JSPH collaborates closely with JSPH Enterprise and the JSPH International Boston Institute for Global Public Health Inc. This triad operates at the intersection of global health systems, research, and capacity building, ensuring initiatives are grounded in real-world impact. (<https://jsphinternational.org/>)
